PROFESSIONAL EXPERIENCE

Deloitte-India

July 2019 - Present

Manager-Industry, Operations and Domain Solutions

Enabling deal coordination and proposal management support across different phases of the pursuit lifecycle for clients in the Energy and Resources space; Leading a team of Senior Consultants, Consultants and Analysts in delivering projects spanning digital transformation, program management, due diligence, feasibility analysis and performance improvement

Sales Enablement Activities:

- Manage end-to-end **bid management process** for creating **responses to RFXs** for pursuits across domains for clients in the Energy and Resources space including understanding customer requirements, getting clarifications, preparing Pre-qualification/Technical/Financial response for RFI/RFP/RFPs.
- Identify inter-dependencies and create an overall project **management plan** for the **bid** with defined tasks, deliverables and associated timelines and track it to closure.
- **Managing proposal teams**, including working with internal and external subject matter experts to develop technical proposals.
- Closely working with SMEs for **bid commercials** in terms of **effort estimations** and **costing** & coordination with multiple stakeholders like solution team, finance team, legal team, risk team etc. to build a synchronized and coherent proposal response
- **Coordinating** with **various departments** including sales, delivery, legal, business, finance, HR etc. for obtaining **approvals**.
- Strategically orchestrate **marketing initiatives** to boost visibility and **strengthen market positioning**, while proactively identifying and nurturing **key accounts** to build enduring relationships.
- Creating a **repository** of **vertical** and **solution specific case studies** and re-usable solution assets that enables multiple users, including sales, to quickly ramp-up collaterals.

Project Management and Delivery:

- **Performance review** including **benchmarking** and **detailed data analysis** to identify avenues for **cost optimization** & **loss reduction** and suggesting remedial measures thereof for an integrated utility in North India.
- **Program management** of **AMI rollout** for a distribution utility in Eastern India including **business process re-engineering**; overseeing **integration between HES, MDM and legacy billing system** leading to **improvement in revenue realization, reduction in billing costs and error-free billing** for the utility.
- Preparation of **Corporate Plan** for an integrated utility in Eastern India focusing on **Entity & Industry analysis**; developing and evaluating **strategic business options**; formulation of **Growth Targets** and **Functional Strategies**.
- **Product Owner** for development and implementation of **GIS-based platform** with **geospatial visualization** capabilities, integrating support for LineString and Polygon geometries to accurately map utility transmission networks.
- **Institutional Strengthening** of power distribution companies in Western India involving **Data Analysis**; **As-Is review** of **commercial process** and **gap analysis**; **Improved** design of **organizational MIS** and **Design of To-Be Commercial Processes**.
- **Transaction Advisory assistance** for selection of investor for a power distribution company in Eastern India.
- **Preparatory Technical Assistance** to a power generation & transmission company in Western India focusing on **assessment of legal, institutional and regulatory** environment and **internationally acceptable models** for **PPP investments**.
- Preparation of **IT roadmap** for a power distribution utility in Bhutan including **assessment** of the **current state** and **digital maturity**; formulation of detailed implementation roadmap including **project charters** detailing the digital initiatives and setting up the **governance structures** for **implementation**.

- **Market entry strategy** for a renewable power producer for venturing into Indian market focusing on **estimation of market size**, preparation of **competitor landscape** and identifying **gaps** in client's **product portfolio** based on **market assessment**.
- Development of **Functional Requirement Specifications (FRS)** and **Request For Proposal (RFP)** for implementing an Integrated ERP Solution for an integrated utility in Africa.
- **Product Owner** for development and implementation of a **Business Intelligence Platform** for a power distribution utility in Eastern India for **analysis of data** related to **Meter Installation, Communication, Daily Billing, Alerts & Tamperers, consumer recharge, ageing of arrears** etc.
- **Program management of strategic initiatives** for **operational and commercial performance improvement** for a distribution utility in Eastern India.
- Business **process mapping, requirement analysis** and **institutionalization of smart grid solutions; project management** support for **implementation** of a unified **revenue management system** for a power distribution utility based in South East Asia.
- **Redesigning procurement function** for a power distribution utility in Eastern India through **Business Process standardization** to increase efficiency in **bid process** and **contracts management** by building **documentations, SOPs** and collaborating with cross-functional teams.
- **Due diligence** for acquisition of a private utility based in North India including **regulatory due diligence, management due diligence, analysis of financial health** and competitive landscape.
- **Project Appraisal** and Cost of Supply versus **Revenue Requirement Analysis** for a power generation utility in Eastern India.
